

The Art of Interview Lighting: A 10-Step Guide

Overview:

Level Up Your Interview Lighting – A Hands-On Storytelling Co-hort Workshop for Filmmakers & Storytellers.

Whether you're just starting out or looking to sharpen your craft, this workshop is your invitation to go deeper into the art of interview lighting – together.

We'll kick things off by watching a video by Art of Documentary (AOD), then walk through their exclusive 10-step blueprint PDF for interview lighting. From there, we roll up our sleeves and put it all into practice – setting up an actual interview lighting arrangement based on everything we've just learned.

This isn't a passive workshop. It's a communal, hands-on experience built around the idea that we grow faster when we learn together. If you're passionate about visual storytelling and want to level up your skills in a collaborative, supportive environment, this is the space for you!

What you'll walk away with:

- A solid understanding of interview lighting principles from AOD's proven framework
- Real, hands-on experience building an interview setup from scratch
- Connection with a community of filmmakers and storytellers in the Phoenix area
- Inspiration and momentum to take your next project further

No prior lighting experience required, just a genuine interest in storytelling and a willingness to learn alongside others.
